Education

Bachelor in ICT & Software Engineering
Fontys university of Applied Sciences

02/2023 – present
Eindhoven,
Netherlands

Projects

Book Review aplplication
Book review web application made in ASP.NET for Semester 2 of Fontys
Developed a book review web application using .NET and C#, integrated with SQL Server, and implemented unit testing .

Word Guessing game
Word guessing game front end and back end for Semester 3 of Fontys
Developed a Dockerized RESTful word guessing game with JWT authorization, featuring a React.js frontend, integrated/unit/end-to-end tests, a MySQL backend, and external integration with a pre-existing Pokémon API

Driessen Employee Portal
Web-Based Portal for Employee Scheduling and Team Management For Semester 3 of Fontys
Collaborated on an employee portal project for Driessen, contributing to Dockerizing the application, setting up the database, and developing key frontend features including employee onboarding, team creation for admins, and employee scheduling.

Technologies

Languages
 C#, JavaScript, HTML, Java

Frameworks & Libraries
 .NET, React.js, Entity Framework

Tools & Platforms:
Docker, Postman, Git, GitLab

Other
REST APIs, Agile Development, CI/CD basics, Unity

Soft Skills

Team collaboration
Strengthened through group projects where I adapted by changing roles to maintain project progress despite differing team priorities.

Communication
Practiced during regular stand-ups and sprint reviews in Agile teams

Adaptability
Developed by shifting roles and responsibilities to keep projects on track

Problem-solving
Applied in debugging and optimizing features during full-stack development

Attention to detail
Critical while writing tests and refining UI in React

Time management
Balanced multiple deadlines and project milestones effectively

Languages

English
Full Working Proficiency (C1)

Vietnamese
Native Proficiency
